Services

We create software for:

WEB

MOBILE

DESKTOP

EMBEDDED

1 PLANNING

Helping you answer the question, *what exactly should I build?*

2 DESIGN

Creating beautiful, easy-to-use interfaces that delight users and make your company look great.

3 DEVELOPMENT

Writing bullet-proof code that runs smoothly and securely across multiple platforms.

4 DEPLOYMENT

Getting your product to users—with minimum hassle.

5 MAINTENANCE

Keeping your product in top shape with block-of-time support contracts that let us respond quickly to your needs.

Visit [our website](#) to see products we've helped create.

Skill Set

Atomic's designers and developers are generalists—mastering many languages, platforms, and practices.

This breadth make us a good fit for projects that cross multiple platforms. Imagining a wearable device that talks to a mobile app and stores data in the cloud? We can do that—all in house.

A few languages & tools we're using

Ruby on Rails	iOS	WPF
.NET	Android	C
JavaScript	Java	C++

Atomic Team

We have about 50 Atoms—designers, developers, testers, and support—spread across our 3 offices.

70 % *of Atoms have 5 or more years of experience*

20 % *of Atoms have 15 or more years of experience*

60 % *of Atoms are employee owners*

Clients

Atomic works with a wide range of clients—from startups to Fortune 500 companies across many different industries.

120 +
clients

200 +
applications created

A few of our clients

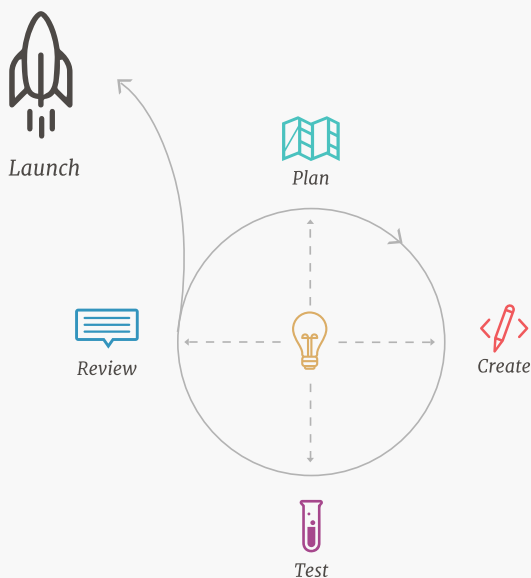

Gentex
City of Grand Rapids
Deluxe
Brunswick Bowling

Steelcase
John Deere
Spectrum Health
Sidereel

Our Approach

Software projects are full of surprises, technical puzzles, and bursts of inspiration. Rather than planning every detail upfront, Atomic sketches out a broad plan and then gets creating.

We make a small piece, test it, discuss it, refine our plan, and then do the whole thing over again. This gives us the power to incorporate new ideas, adapt to change, and launch the best product possible.

History + Growth

Atomic Object was founded in 2001 on the belief that not all software is created equal. Many people can write code, but it takes a close-knit team of passionate people to create exceptional, innovative software products that change the way people do business.

Since that time, we've enjoyed stable, organic growth and a healthy backlog of projects. In 2012 we opened a second office in downtown Detroit, and in 2013 we acquired SRT Solutions in Ann Arbor.

Carl Erickson, our co-founder and CEO, wants Atomic to be the first 100-year-old software consultancy. We think we're off to a pretty good start.

Our Values

Give a Shit

Own It

Teach and Learn

Share the Pain

Act Transparently
